SKILLS

- **Linux & Scripting:** Python, bash, HCL, PowerShell, Shell, JSON, YAML, SQL, CLI
- **Cloud Platforms:** AWS, Google Cloud Platform (GCP), Azure
- **Containerization:** Docker, Kubernetes, Nomad, Helm
- **Monitoring and Logging:** Cloud Monitoring, Prometheus, Grafana, Loki, Alloy
- **DevOps Tools:** Jenkins, GitHub Actions, Terraform, Ansible, Pulumi, GitHub

EXPERIENCE

Imbod, Cloud Engineer, July 2025

Lagos, Nigeria

- I Configured and maintained Linux-based application servers on Google Compute Engine, ensuring secure and reliable deployments.
- Automated infrastructure provisioning and configuration management with Terraform and Ansible, increasing deployment efficiency by 40%.
- Delivered cloud solutions with Terraform, minimizing setup time by 60% using terraform modules.
- Supported systems integration, networking, and security configuration across cloud workloads.

PROJECTS

Mira Essentials Full-Stack E-commerce Application

- I Built and deployed a production ready e-commerce website with React/Vite frontend and Node.js/Express backend.
- Implemented product variants carts and checkout functionality, customer order tracking, Paystack payment, bank transfer payment confirmation workflow, and an admin dashboard.
- Integrated PostgreSQL with Prisma ORM for product, order, payment, and customers data management. [Verify Here](#)

CI Pipeline Automation

- Integrated version control using Git and GitHub for streamlined collaboration and code tracking.
- Built and configured a continuous integration pipeline using GitHub Actions to automate testing and deploying for a demo application. [Verify Here](#)

EDUCATION

Gregory University Uturu, B.Sc in Computer Science. Abia, Nigeria

CERTIFICATES

Google Cloud Certified Associate Cloud Engineer - [Verify Here](#)
